Lew:

Per our conversation at lunch, I thought you might be interested at least in reading the attached paperwork on the Headquarters Drug Seminar Program. (We have substituted the actual notice for the draft which was attached to the covering memorandum.) You may retain or destroy as you desire.

The book cable has not been sent out pending a review of some data supposedly available in the Department of State which might preclude our having to impose this workload on all stations.

(Signed) John W. Coffey
